

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently amended) A ~~computerized method~~ computer readable medium having computer executable instructions for performing a method for adding an association of a project management object to a set of associated project management objects, wherein a link set data structure corresponds to the set of associated project management objects, the method comprising:

creating a link content data structure comprising a link set reference field, an object reference field, and a start time field;

adding an association of the project management object to said set of associated project management objects by setting said link set reference field in said link content data structure to a value that refers to said link set data structure corresponding to the set of associated project management objects;

setting said object reference field in said link content data structure to refer to the project management object; and

setting said start time field in the link content data structure to a value representing the current time.

2. (Currently amended) The ~~computerized method~~ computer readable medium of claim 1, wherein setting an object reference field includes setting the object reference field to a URL (Uniform Resource Locator) that locates the project management object.

3. (Currently amended) The ~~computerized method~~ computer readable medium of claim 1, wherein the link content data structure is a row in a database.

4. (Currently amended) The ~~computerized method~~ computer readable medium of claim 1, wherein the link set data structure is a row in a database.

5. (Currently amended) The ~~computerized method~~ computer readable medium of claim 1, wherein the project management object is selected from the group consisting of:

source code file, development issue data, bug data, project milestone, and software specification file.

6-21 (Canceled)

22. (Previously Presented) A computer readable medium having computer executable instructions for performing a method for adding an association of a project management object to a set of associated project management objects, the method comprising:

creating a link content data structure;

setting a link set reference field in said link content data structure to a value that refers to a link set data structure corresponding to the set of associated project management objects;

setting an object reference field in said link content data structure to refer to the project management object; and

setting a start time field in the link content data structure to a value representing the current time.

23. (Original) The computer-readable medium of claim 22, wherein setting an object reference field includes setting the object reference field to a URL (Uniform Resource Locator) that locates the project management object.

24. (Original) The computer-readable medium of claim 22, wherein the link content data structure is a row in a database.

25. (Original) The computer-readable medium of claim 22, wherein the link set data structure is a row in a database.

26. (Original) The computer-readable medium of claim 22, wherein the project management object is selected from the group consisting of: source code file, development issue data, bug data, project milestone, and software specification file.
